

ETREL INCH HOME

LAYING GROUNDS
FOR A LASTING
E-MOBILITY

INTERACTIVE CHARGING. IT'S ALL ABOUT EFFICIENCY.

Your Etrex INCH HOME wallbox charger is easily the smartest device in your home. It can predict your EV charging habits and help you charge the car by the time you need it, at the lowest possible cost. When coupled with the Load Guard sensor, the charger can automatically adjust to all other consumers, including any local power generation, such as rooftop solar panels. With several connectivity options (including PLC, WiFi, and Ethernet) and open protocol support, the charger can be seamlessly integrated in your smart home.

INTELLIGENT AUTONOMY

Set your departure time or let the station predict it for you. Your car will be ready when you are.

MAXIMUM POWER ON ANY CONNECTION – UP TO 22 kW

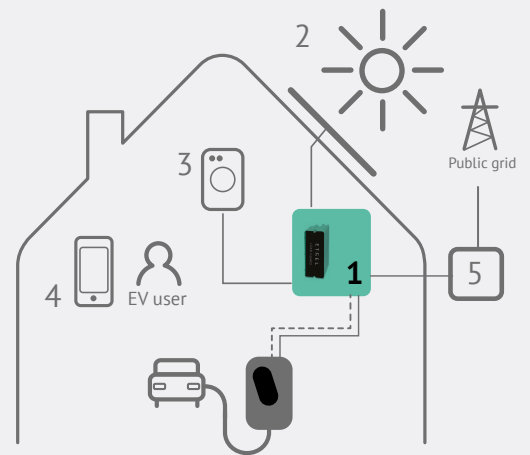

By adding Load Guard you'll enjoy the fastest possible charging and never blow the fuse.

INSTALL ANYWHERE

With IP 54 aluminium housing, your charger is prepared for even the toughest environments.

A POWERFUL WEB INTERFACE

Connect over WiFi and control the charger from your favourite browser.

Shatter proof acrylic glass plate is secured in a cast aluminum housing. Weatherproof and designed to last.

CHARGE YOUR CAR FASTER. WITHOUT OVERLOADS.

Unique magnetic cable holder lets you use and store the cable quickly, without getting your hands dirty.

**Only on INCH models with built-in charging cable.*

Web app works on any connected device and gives you an in-depth insight in your charging.

INCH Home learns and predicts your departure time. Relax while automated cost-optimised charging takes place. When in a hurry, choose fast charging with the touch of a finger.

WHAT IF EVERYBODY DROVE ELECTRIC?

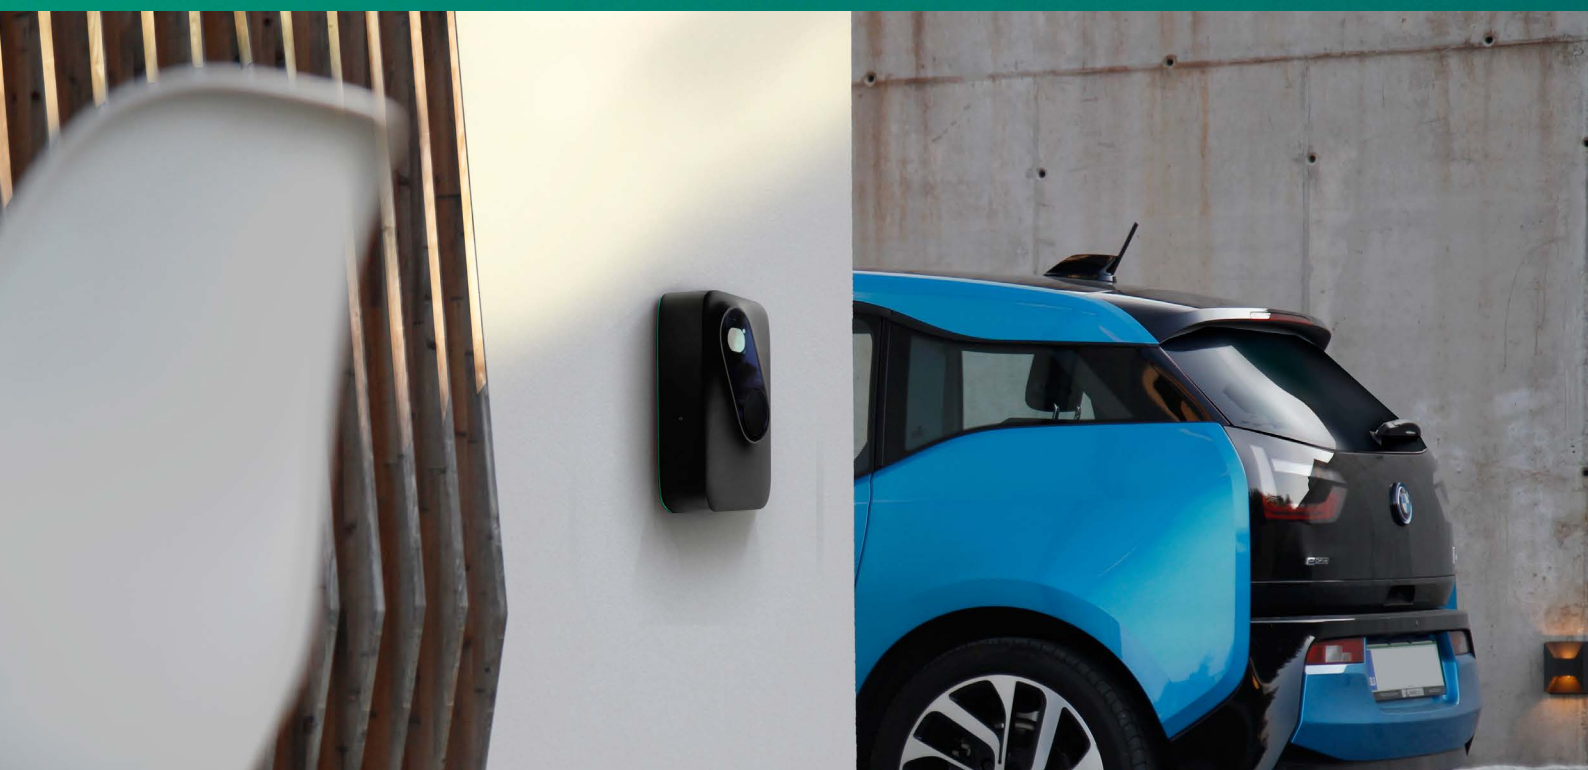

Electric vehicles are only as clean as the electricity that powers them. To maximise the use of renewable energy, each Etrek INCH wallbox is able to interact with the power network while making sure that the drivers enjoy their freedom to drive and are rewarded for using the greenest power. And the

beauty of it? It's all done autonomously, listening to your needs and observing the limits of your home connection. With Etrek's interactive charging technology, each new electric car adds to the solution, not to the problem. Join us in laying the grounds for a lasting e-mobility.

Co-funded by the Horizon 2020
Framework Programme
of the European Union

Etrek INCH is a product of research and development that was awarded as part of the SME Instrument programme, dedicated to the most innovative European companies.
